Wisconsin Telecommunications Relay

Wisconsin Relay Makes Telecommunications Accessible for Nonstandard Phone Users

What is Wisconsin Relay?

Wisconsin Relay is a no-cost, completely confidential 24-hour public service that makes the use of the telephone possible and a better experience for many thousands of citizens and visitors of the state who are deaf, hard of hearing, deaf-blind, speech-disabled, and hearing.

How does Wisconsin Relay work?

The person dials the toll-free Wisconsin Relay number and gives the relay operator the area code and number of the person receiving the call. An example of a Wisconsin Relay service is a highly trained relay operator who voices the typed comments by the TTY (text telephone) user and types the spoken comments by the other person back to the TTY user. Wisconsin Relay provides several options to meet the needs of people who do not use the standard telephone.

How to connect to Wisconsin Relay

Dial: 711 *	Voice Carry-Over: 1-877-490-3724
TTY: 1-800-947-3529	Hearing Carry-Over: 1-800-947-3529
Voice: 1-800-947-6644	Speech-to-Speech: 1-800-833-7637
ASCII: 1-800-267-8867	Spanish-to-Spanish: 1-800-833-7813
	Spanish-to-English: 1-877-490-3723

* Some buildings with a PBX telephone system (often in hotels and offices that have extension numbers) make reaching 711 not possible. The above 800 numbers can be dialed when not able to get through to 711.

CapTel®—a no-cost captioned phone service

CapTel, short for captioned telephone, users place calls in the same way when dialing with a standard telephone. Utilizing voice recognition technology that displays verbatim captions of the conversation on screen of a telephone or computer screen, the CapTel user can hear and read what the other person is saying.

How do I apply for specialized telephone equipment?

The Telecommunications Equipment Purchase Program (TEPP) provides qualified applicants (proof of a disability that makes using a standard telephone difficult or impossible) with vouchers to purchase assistive telephone equipment. A person can apply for a voucher by visiting: www.wisconsinrelay.com/tepp or calling 1-800-251-8345 (TTY in state only) or 1-608-231-3305 (Voice).

Services supported by surcharge

A few cents per telephone bill surcharge makes Wisconsin Relay services possible for the citizens of Wisconsin. T-Mobile is the provider of the relay services for Wisconsin.

711 is not an emergency number

Some people might assume it is okay to call 711 for emergencies. The 711 Wisconsin Relay number is for relay service calls only. The Americans with Disabilities Act (ADA) requires that 911 centers be prepared to handle emergency calls from people who use the text telephone. Wisconsin Relay will make every effort to assist a person during an emergency but cannot serve in the same function as 911 centers. Wisconsin Relay does not assume responsibility for handling emergency calls.

HOW TO CHOOSE A STRONG PASSWORD

For every account that you have online, creating a strong password is important in today's identity crisis. More than 80% of breaches are caused by weak or reused passwords. Creating a strong password is essential. Here are some tips.

- Choose a password that is not easy to guess. Don't use birthdates, or names of family members or pets. Make sure you stay away from personal or relevant information that others could easily identify.
- Do not share passwords.
- Make sure your passwords are long. At least 10 characters in length is recommended and there should be a combination of numbers and letters (both upper and lower case). Adding symbols or spaces is a good idea if the site allows.
- If you have to write your passwords down, make sure they are in a secure, accessible location. Never keep them by your computer.
- Consider a password manager that not only manages your passwords, but will create and remember strong passwords for you.
- Remember to update and vary passwords. You shouldn't use the same password for more than a few months at a time and using a different password for every online site you access is a good idea.
- Your bank, email, phone, ISP and data-storage accounts are critical. Take extra steps to protect these. If you haven't done so, set up a two step verification for these. Two step verification requires an additional code that's sent to your phone.
- Come up with a passphrase or a sequence of random words to create your password. It's a good way to help you remember your passwords, so only you will remember. Use upper and lower case in the phrase and use symbols in place of certain letters. An example of this would be: *mydogFidoloves2chewonboneS!*
- Do not enter your password on other computers (especially in public places).
