

# Quick Start Guide:

## Setting up your GigaSpire BLAST u4m

Before starting your Mesh Satellite installation, review the Placement Guide within the VernonCom MAX app.

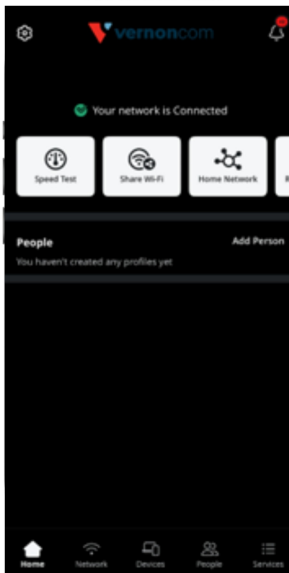

**1**

Plug your mesh satellite into a power outlet using the supplied power cable.

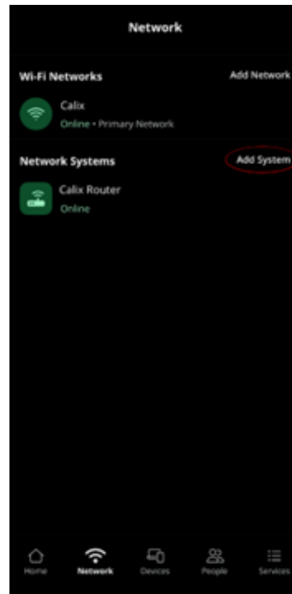

**2**

Open the VernonCom MAX App. At the bottom of the screen, tap the Network tab.

**3**

Under the Network section, tap Add System on the right side.

**4**

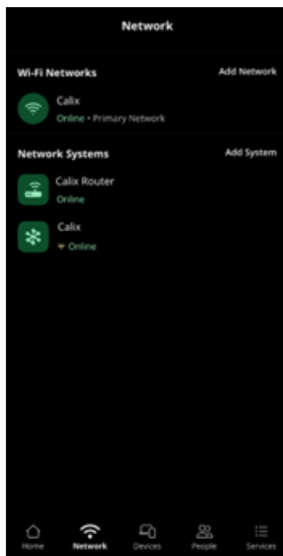

Scan the QR code located on the bottom of your Mesh u4m or inside the box it came in.

**5**

Once complete, you will see your newly added mesh satellite in the Equipment section within My Network.

Tap into the mesh satellite to see additional details.

The signal strength reading will tell you how strong your signal is.

Pro Tip: You will see Excellent, Good or Weak. Move your mesh router closer to your router to improve the signal.
